SUMMARY

Mohammad is a skilled Java Application Developer with over five years of experience delivering robust and scalable enterprise solutions. He has worked with large-scale enterprises, building applications that enhance business efficiency and growth. Proficient in Java, Docker, Kubernetes, PL/SQL, GraphQL, and cloud technologies, he excels in microservices, distributed storage, and API integration. Mohammad is committed to clean, efficient code and solving complex problems. For top-tier enterprise solutions, connect with Mohammad to bring your vision to life!

Experience

Senior Associate Technology L1

Publicis Sapient

Remote, Gurugram

Nov 2023 – Present

- Spearheaded the creation of a comprehensive library designed specifically for integrating GCP PubSub seamlessly within Spring Boot projects.
- Leveraging the power of annotations, developers can effortlessly configure required topics and channel names, eliminating the need for cumbersome manual setup.
- This innovation streamlined development, reduced setup complexity, and accelerated project timelines, enabling teams to focus on core functionalities and improve efficiency.

Senior Java Developer

Paypal CW

Remote, Mohali

Aug 2022 To Aug 2023

- Spearheaded the re-architecture of legacy payment systems to enhance capabilities and future-proof infrastructure.
- Managed high-traffic endpoints handling 70% of PayPal's global payments, focusing on performance, availability, and security.
- Mentored junior developers to improve team efficiency, maintained strong client relationships with positive feedback, and contributed to team growth through hiring and talent acquisition.

Systems Engineer

Tata Consultancy Services Ltd, Bangalore

Remote, Bangalore

April 2021 to Sept 2022

- Key contributor to developing and maintaining a core service for a major e-commerce app, managing data distribution to downstream systems.
- Enhanced warehouse efficiency, improved system reliability, and optimised performance by collaborating with cross-functional teams and analysing performance data to prevent downtime.

Associate Analyst

Global logic India Pvt. Ltd

Remote

July 2020 To Nov 2020

- Researched and applied advanced machine learning and computer vision techniques in visual object recognition, tracking, self-localization, and 3D reconstruction.
- Improved positioning accuracy and 3D representation while synthesizing findings to develop innovative solutions, advancing project objectives.

Freelancer

Freelancer

Remote

June 2019 To June 2020

- Developed Flutter mobile apps with custom UI, animations, and widgets, optimized for iOS and Android. Collaborated with design teams to create intuitive, responsive solutions based on user requirements.

Education

Jamia Millia Islamia, New Delhi - 110025
Bachelor of Technology

Aug 2015 – Aug 2019

Projects

Business IT Transformation Website

<https://github.com/mr-dilshad/subhan-studio> 

- Created a website for hiring engineers online, transforming IT business workflows.
- Tools Used: Angular, Java, Azure Function, mailchimp

Newsletter System

<https://github.com/mr-dilshad/my-newsletter-service> 

- Designed a subscription-based service for newsletters, enabling users to subscribe to receive updates.
- Tools Used: Azure Function, Java Springboot, Azure Table

Order Management System

<https://github.com/mr-dilshad/my-newsletter-service> 

- Developed an online food ordering system via QR code scanning, ideal for busy bars and restaurants.
- Tools Used: Angular, Springboot, Mysql

Email Notification System

<https://github.com/mr-dilshad/emailService> 

- Built a system for sending email notifications with acknowledgment tracking.
- Tools Used: Java, Springboot

Technologies

Languages: C++, C, Java, Javascript, TypeScript, Python, Dart, C, Scala

Backend Technologies: .SpringBoot, Spring Cloud, Spring Security, Spring Webflux

Frontend: Flutter, Angular.js, React.js

Cloud: ARM Templates, Kubernetes, Helm charts, CI/CD using Azure DevOps, Docker, AWS

Others: Git, Bash, sql, nosql, Multithreading, Memory Management, Caching Framework
